

ALCOHOL INK WORKSHOP

January 8 – 10, 2019

Materials List

If you have never painted with Alcohol Inks, and would like a “starter kit” ordered for you, Kathleen will provide 10 colors of ink, Blending Solution, Yupo, and key tools for \$30. Payable on-line at registration. The best on-line source to buy your own is misterart.com. Not much available locally.

If you have your own Alcohol Inks bring your favorite colors; a selection of warm & cool colors, as many as you want to bring. Include a white, black and teakwood if you have them. I generally buy Adirondack inks for their variety but Jacquard makes some good colors too, especially blues & a nice gold.

Everyone should bring:

Isopropyl Alcohol: a pint or so should do it. Available @ Winco, Rite-Aid, hardware stores, & probably Costco.

Spritzer bottle (for alcohol): small, fine spray like you'd use to clean eye glasses.

Q-Tips, a handful

Drinking straws & plastic coffee stirrers (a few)

Paper towels

Brushes: a few small rounds ;, size 2-8. Leave nice W/C brushes home. 2 foam brushes, 1" & 2"; Yupo Paper, 8 ½ x11" & 11 x 14" or whatever size you like

Pencils if you like to sketch before painting. I often sketch major shapes with a diluted color but sometimes use pencil. Note: erasing leaves unwanted marks.

Consider plastic gloves or “Gloves In A Bottle” (Ace Hardware) to protect sensitive skin. Also consider a mask if you're sensitive to upper respiratory issues. The Studio is well ventilated, but some are more sensitive than others. Wal Mart carries a good one.
